# LIGHT UP AFRICA

## THROUGH THE LENS OF AFRICAN CHILDREN

*One Africa Child*
*One Solar Lamp*

# INTRODUCTION

Hundreds of thousands of African children, especially in the rural poor communities, and particularly grass roots school pupils, have no access to clean, affordable, and efficient energy for lighting which they use for study. They, instead rely on kerosene stoves or candles both of which pose respiratory health risks, carbon emissions, environmental pollution, and in some cases fire outbreaks from poisonous gases

# PROJECT CONCEPT

This initiative aims to address these challenges by ensuring that each African child in the rural poor communities has access to at least one solar reading lamp for studies at night

# THE MILESTONE OF THIS PROJECT

- Phase 1: 1000 children/LGA in 774 LGAs - 774000 Solar reading lamps to be distributed in Nigeria West Africa Sub Region
- Phase 2: South Africa Sub Region
- Phase 3:Central Africa Sub Region
- Phase 4: North Africa Sub Region
- Phase 5: East Africa Sub Region

# Benefits of the Project to CSR

# Benefits of the Project to African Children

To promote Climate Change Resilience in Children through the use of green devices.

To conduct life skills opportunities to build green character and empower Children to mitigate Climate Change.

# Benefits of the Project to African Children Contd

To organize community clean-up and instill a sense of green pride in rural children to stop the use of fossil fuel eg kerosene lamps which are injurious to their health.

To enhance and improve the health/well-being of rural children by facilitating access to essential green devices like the solar reading lamps.

To foster a sense of community and social inclusion among rural children by promoting cultural preservation, mentorship, and green development.

# Benefits of the Project to African Children Contd

To provide a coordination platform for rural children that will harness the intrinsic green value addition in their coexistence in the eco system.

To create the impact of green learning and quality education for children in rural communities.

To Create a community of sun energy friendly products usage for African Children while catching them young.
